

XM Satellite Radio is the best communication of music, news, sports and entertainment nationwide that I have ever experienced. The above statements arranged by XM itself, particularly the statments made about the NAB, (POWERMONGERS), feeling the threat of competition. GOOD! Ofcourse there upset! There all peeing there pants because somthing much better has evolved. So what do those do who just haven't seemed to figure out how to stop wetting the bed? They cry for there mommy and daddy to come save the day, rather than figure out on there own how to solve the problem. In other words they don't know how to think for themselves and be creative. Instead they want to be jealous of somthing that they haven't come up with themselves and wished they had.

So you decide, Congress. Who is honorable?

PS. Why don't you all stop fighting about these petty issues anyway and start focusing on the world's issues and grow up. "You" are the people I'm talking about and you know who you are.

Scencerely,

ANDREW
